## Aluminium Quickstage Scaffolding

Scaffold king specializes in aluminium Quickstage scaffold. It's lightweight design, modular components and flexibility make it easy to transport and work with, making any job a breeze. Aluminium Quickstage scaffold was designed to go where the commonly used steel scaffold couldn't.

Versatile, strong, quick and light weight .

Internal ladder access is provided in all scaffolds. (Stair access can be added at customer request)

Safe workload is 450kg per bay.

Scaffolds can be built up to 20m in height.

Scaffolding widths: 0.7m, 1.2m.

Scaffolding lengths: 1.8m, 2.4m and 3.0m

Advantages with Aluminium Quickstage Scaffold:

- Perfect for any job where working at heights is an issue.
- Safe, strong and durable.
- Custom Engineered design which goes beyond Australian standards.
- Lightweight means quick install, dismantle and to transport which saves the customer money.
- Safe and comfortable as working on the ground which will save you time and money.
- So versatile that it can be built anywhere at anytime.
- Cost effective solution to your working at height or access problem.
